

A diagram showing a central rectangular block labeled '2'. To its left is a vertical rectangular block labeled '1'. To the right of block '2', there are three branching paths, each represented by a rectangular block: block '3' branches upwards and to the right, block '4' branches downwards and to the right, and block '6' branches downwards and to the right. From block '3', a path continues to the right as block '5'. From block '4', a path continues to the right as block '7'. From block '6', a path continues to the right as block '7'. The blocks are arranged in a way that suggests a flow or relationship from left to right, with block '2' acting as a central hub.
